

2013 KICKAPOO HEALTH FAIR

April 9th 2013

Abandoned Wells Brochures at the Kickapoo Environmental Office Booth

Water Conservation Ideas

Low Flow Showerheads

- Showering is one of the top uses of residential water in the United States, representing approximately 17 percent of indoor water.
- Using low-flow showerheads decreases the amount of water you use while showering, ultimately lowering the amount of money you spend on your water bill.
- There are many showerheads available in the stores, each with its own pros and cons.

Water Conservation

- Measuring water levels is a good way to check water conditions. While it's important to provide water to plants, equally important is ensuring that they receive the right amount.
- Conserving is the most common cause of plant deaths.
- A soil moisture meter shows how much of the water that's in your plants is the kind you provide them with water.
- Rain-gauge is another measuring instrument.

**KICKAPOO
ENVIRONMENTAL
OFFICE**

Mission Statement

The mission of the Kickapoo Environmental Office (K.E.O.) is to promote the safety, health and welfare of the Kickapoo Tribe in Kansas and improve the quality of life on the Kickapoo Reservation by safeguarding the natural environment and natural resources. The overall program goal is to develop a comprehensive environmental protection program for the Kickapoo Tribe in Kansas that will protect the natural, cultural, and human resources on tribal lands.

What is a Wetland

- [illegible]

1. The following are the steps in the process of the cell cycle:
1. Prophase
 2. Metaphase
 3. Anaphase
 4. Telophase
 5. Cytokinesis

- 1. **Highly variable** - high variability in expression of the protein
- 2. **Highly variable** - different levels of expression in different tissues
- 3. **Highly variable** - different levels of expression in different cell types
- 4. **Highly variable** - different levels of expression in different developmental stages
- 5. **Highly variable** - different levels of expression in different environmental conditions

- [illegible]

Wetland Benches

- *Staphylococcus aureus*
- *Streptococcus pneumoniae*
- *Streptococcus pyogenes*
- *Streptococcus viridans*
- *Streptococcus faecalis*
